# **SPECIFICATIONS**Top Terminal Batteries

#### From the World Leader in VRLA Battery Technology

Designed for superior, high-rate performance in uninterruptible power supply (UPS) applications, the **SPRINTER** series offers high power density and reliability. The SPRINTER family of batteries highlights another example of GNB Industrial Power's extensive experience and world-wide leadership in VRLA technology.

"Designed in" Quality Manufacturing

Quality manufacturing processes for the SPRINTER series batteries incorporate the industry's most advanced technologies including: an automated helium leak detection system, a computer controlled "fill by weight" acid filler, and a temperature controlled water bath formation process. A constant current discharge test is performed on each and every unit prior to shipment.

#### High Performance SPRINTER® Series Features

- Standard: Reinforced polypropylene container and cover.
- Optional: Flame-retardant reinforced container and cover compliant with UL94 V-0.
- Integrated flame arrester ultrasonically welded into cover.
- Patented "Diamond Side-Wall" design to maintain structural integrity in higher operating temperatures.
- Heat sealed case-to-cover bond to help ensure a leak proof seal.
- High-Compression Absorbent Glass Mat (AGM) technology for greater than 99% recombination efficiency.
- High-tin, calcium, silver, lead positive plate design for maximum service float life: 8 year design life
  25°C (77°F); 10 year @ 20°C (68°F)
- Heavy duty copper alloy terminals for ease of assembly and reduced maintenance.
- Reliable one-way, self-resealing safety vents.

- Multicell design for faster installation and reduced maintenance.
- Horizontal or vertical operation.
- Removable carry handles for ease of installation.

#### **Applications**

**SPRINTER** series batteries incorporate advanced VRLA technology designed for superior high-rate performance in uninterruptible power supply (UPS) and power quality applications.

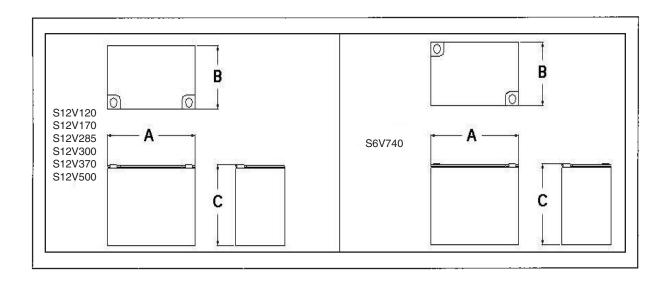

SPRINTER Specifications

<sup>\*</sup> Bolt, washer, and connector typically increase height by 0.45 in. (11 mm)

<sup>#</sup> Add suffix "F" to model number for flame retardant jar option

#### Float Voltage & Charging

Constant Voltage charging is recommended

Recommended float voltage: 2.27 VPC @ 25°C (77°F)

Float Voltage Range: 2.25 to 2.30 VPC @ 25°C (77°F)

Equalize voltage: 2.35 VPC for 24 Hours

#### **GNB Industrial Power –** The Industry Leader.

GNB Industrial Power, a division of Exide technologies, is a global leader in network power applications including communication/data networks, UPS systems for computers and control systems, electrical power generation and distribution systems, as well as a wide range of other industrial standby power applications. With a strong manufacturing base in both North America and Europe and a truly global reach (operations in more than 80 countries) in sales and service, GNB Industrial Power is best positioned to satisfy your back up power needs locally as well as all over the world.

Based on over 100 years of technological innovation the Network Power group leads the industry with the most recognized global brands such as ABSOLYTE®, GNB® FLOODED CLASSIC®, MARATHON®, ONYXTM, RELAY GEL®, SONNENSCHEIN®, and SPRINTER®. They have come to symbolize quality, reliability, performance and excellence in all the markets served.

GNB Industrial Power takes pride in its commitment to a better environment. Its Total Battery Management program, an integrated approach to manufacturing, distributing and recycling of lead acid batteries, has been developed to ensure a safe and responsible life cycle for all of its products.
